

3D Credit Card builder V1.2

Note: Minimum requirements are Motion 5.4.2 and Final Cut Pro X 10.4.4.

1)Installing

When you unzip "3D Credit Card builder" you will notice that you have 2 folders inside.

"3D Credit Card Generator" and "3D Credit Card Project"

Copy "3D Credit Card Generator" to "Users > 'your username' > Movies > Motion Templates > Generators"

then copy "3D Credit Card Project" to "Users > 'your username' > Movies > Motion Templates > Titles"

Both can be opened in Motion 5.4.2 or Final Cut Pro X 10.4.4

2)Editing in Motion 5.4.2

When you open "3D Credit Card Project" in Motion 5.3 go to "Media bin" click on the "Envato Logo" and replace it from the Inspector > Media > Replace Media File

Now logo is replaced in every scene. Repeat the same step for "wifi.png", "World map pixel", "chip" and "bg" if you wish.

Now once is that done you can Expand "Credit_Card" group, change the text and adjust the fonts and colours.

You can also adjust Camera.

Note: Under "Credit_Card" you have "Front and Back Credit Card groups"

To rotate card you need to do that from "Credit_Card" properties so both sides can be rotated at once.

Clone scenes do not require to be edited.

Repeat the same step as above for "Credit_Card_Rotating 360-01" and "Credit_Card_Rotating 360-02"

To change or adjust the background expand "Background group" That's it.

3)Editing in Final Cut Pro 10.4.4

When you open FCPX 10.3 go to "Generators"

Click on the "3D Credit Card" generator and drag it in Timeline.

Now click on "Show The Generator Inspector"

Now you have 2 options

1st is to open that Generator in Motion 5.4.2 and Edit it

2nd is to edit it in Final Cut Pro X it's up to you.

Inside "The Generator Inspector" replace all texts, adjust the fonts and size, drag'n drop your logos, change the background and you are ready to integrate your video with 3D Credit Card builder.

3) Assets and Support

Fonts used:

Courier Regular – Already installed in MAC OS
