

THANKS FOR PURCHASING !

Please make sure you have the Procreate 5.

Check on the App Store to make sure you haven't missed update iOS

Use any app to unpack the .zip file (I use iZip) on your iPad (if you haven't unzipped it already)

Navigate from your iPad through "Files" folder to the Zip.

Select zip file and choose option Share (open) - "Open in iZip" app (or whatever app you use).

iZip app will be opened and you will see the .zip file here. Tap on it - it will be unpacked.

Open the unpacked folder - find Neon _JA - tap

the "i" button and choose Open in -> Open in Procreate. All of the brushes will appear in Procreate as one Brushset in Brush sets menu panel.

If you have any questions or issues don't hesitate to contact me.

I love to help!
