01. Drop down the group "Logo"

02. Select the layer "Logo"

The screenshot shows the Apple Motion software interface. The top menu bar includes File, Edit, Mark, Object, Favorites, View, Share, Window, and Help. The top status bar shows 96% battery, Wi-Fi, and the date/time: Wed 9:13 AM. The interface is divided into several panels: File Browser, Library, Inspector, Layers, Media, and Audio. The Inspector panel is open, showing the Properties section with Transform and Blending properties. The Transform section shows Position (X: 0 px, Y: 119.0 px), Rotation (0 °), Scale (100 %), Shear (X: 0 °, Y: 0 °), and Anchor Point (X: 0 px, Y: 0 px). The Blending section shows Opacity (100.0 %), Blend Mode (Normal), Preserve Opacity (unchecked), and Casts Reflection (Yes). The Layers panel shows a list of layers: 01_..., 02_..., cod..., For..., For..., Mat..., and Mat... The Timeline panel shows a sequence of layers: Logo, Edit_Color_Effects, Match Move, Effect03, Effect02, Effect01, Grow, and Logo. The main preview window shows a logo being positioned on a background. The logo is a white eagle head with a yellow beak. The background is a dark, rocky landscape with a bright light source. The text "Your Tagline Here" is visible below the logo. The timeline shows the logo layer selected, and the position is being adjusted. The status bar at the bottom shows "251 frames duration Custom 1920 x 1080 25".
