

Hello! Thank you for purchasing Glitch Logo!

Fonts used in preview: *Helvetica Neue Medium, Muller*

## MOTION 5

- Please open the project file *Glitch Logo FULL HD* or *4K*.
- To insert a logo open the “Glitch Logo” folder and drag your logo to LOGO layer at the bottom. Go to **Published parameters** menu to change logo position, scale and effects.
- All logo settings can be found in published parameters menu.
- **If you need original logo colors**, please turn off **Logo Colorize** and **Hue 3** in Published parameters menu.
- If your logo is totally black, please adjust **levels** parameter (in Published parameters menu) to add more brightness to glitch animation.
- Change such effects parameters as Bad TV, Prism, Wave Effect, Zoom Blur etc in Published parameters menu.
- You can use markers on the timeline to easily find effects you need.
- All effects can be also modified and repositioned using a timeline.

## FCPX

- For use in Final Cut Pro X, please go to FCPX folder and copy **Glitch Logo** folder to **Applications/ Final Cut (right click-Show package Contents) / Contents / Plugins / MediaProviders / MotionEffect.fxp /Contents / Resources / Templates / Generators**

- Open Final Cut Pro X. Go to **Titles and Generators sidebar - Generator - Glitch Logo** and drag *Glitch Logo FULL HD* or *4K* in to the timeline. Select the generator on timeline and go to Generator Inspector menu. Here you can insert logo, change parameters and effects.

- To insert logo, select generator on the timeline, go to Generator Inspector menu, select LOGO placeholder and choose your logo from the browser, then click Apply Clip. Change logo settings in Generator Inspector menu.

- Go to Published parameters menu to change all effects, colors, background, text etc.

- **If you need original logo colors**, please turn off **Logo Colorize** and **Hue 3**.

- If your logo is totally black, please adjust levels parameter to add more brightness to glitch animation.

- You can change a template duration just by stretching it.
