

Hello! Thank you for purchasing Techno Glitch Opener!

Fonts used in preview: *Trans-America, Helvetica*

MOTION 5

- Please open the project file *Techno Glitch Opener Full HD* or *4K*.

Project consists of **24** Media placeholders, **30** texts and **Logo** placeholder.

- To insert your media please Open PHOTO 1 folder, go to MEDIA 1 folder and insert your photo or video in to MEDIA 1 layer. Do that with every PHOTO folder to each disabled MEDIA layer, or.... Open project pane and type MEDIA. Insert your media in every MEDIA layer. Type LOGO and drop your logo inside.

You can change size, position etc. in the **Published parameters** menu or by selecting each MEDIA layer and going to **Inspector-Image, Pan** and **Scale**.

To trim your video - hold OPTION key + left mouse button, then drag it to the left or to the right.

PHOTO folders can be duplicated by selecting PHOTO folder and pressing CMD+D.

- To change text, go to PHOTO 1 - TEXT 1 - TEXT 1 layer, select text layer and go to **Inspector - Text - Format** to change such text parameters as font, position scale, tracking, color etc.

Select Replicator layer (PHOTO - TEXT - TEXT - Replicator) and go to Inspector - Replicator menu and change such parameters as Points, Offset, Position, Scale etc. It can be also found in Published parameters menu.

Text can be duplicated by duplicating a TEXT folder.

- To change logo settings, open PHOTO 24 & LOGO folder and select LOGO layer at the bottom. Go to **Inspector-Image, Pan** and **Scale** to change scale and position. All logo settings and logo text can be found in Published parameters menu.

- You can find all the adjustments and effects in the Published parameters menu (Project - Inspector - Project-Publishing - Published parameters).

FCPX

- For use in Final Cut Pro X, please go to FCPX folder and copy **Techno Glitch Opener** folder to ***Applications/ Final Cut (right click-Show package Contents) / Contents / Plugins / MediaProviders / MotionEffect.fxp /Contents / Resources / Templates / Generators***

- Open Final Cut Pro X. Go to **Titles and Generators sidebar - Generator - Techno Glitch Opener** and drag *Techno Glitch Opener Full HD* or *4K* in to the timeline. Select the generator on timeline and go to Generator Inspector menu. Here you can insert media, logo, change parameters and effects.

- To insert your media, select generator on the timeline, go to Generator Inspector menu, select MEDIA 1 placeholder and choose your media from browser, then click Apply Clip. Do that with every MEDIA placeholder.

- To insert logo, select generator on the timeline, go to Generator Inspector menu, select LOGO placeholder and choose your logo from browser, then click Apply Clip. Change logo settings in Generator Inspector menu.

- To edit text, double click on the centre of the viewer window to select main text. To select secondary text, just double click on it using a viewer window (look for video tutorial text selection guide at 13:05). Go to Text inspector to edit text and adjust parameters.

- Go to Published parameters menu to change all effects, text parameters etc.

- You can change a template duration just by stretching it.

Music used in preview: <https://audiojungle.net/item/abstract-background/26189430>

- This project requires Motion **5.3.2** or Final Cut Pro **10.4.3** and above

Enjoy!
