

Video Bumper

Note:

Required Motion 5.3.2 or Final Cut Pro X 10.3.3

Updated Version works with FCPX 10.4.4 or Motion 5.4.2 and newer versions

~ HOW TO INSTALL THE TEMPLATE ~

This template can be used inside Final Cut X with or without Apple Motion installed.

USE this method if you have Motion installed on your Mac
Video Bumper folder to:

~/Movies/Motion Templates/Generators

USE this method if you DO NOT have Motion installed on your Mac
Copy Video Bumper folder to:

/Applications/Final Cut Pro/Contents/PlugIns/
MediaProviders/MotionEffect.fxp/Contents/Resources/Templates/
Generators

USE this method if you have BOTH (FcpX & Motion) installed:

Copy Video Bumper folder to:

/Movies/Motion Templates/Generators/

Font used for Titles – Montserrat:

Download: <https://www.fontsquirrel.com/fonts/montserrat>

Music used:

<http://audiojungle.net/item/glitchy-elegant-digital-logo-01/2073708>

2) Editing in Motion 5.3.2 or 5.4.2

When you open the template click on "Project" layer in timeline, go to "Inspector" > "Project" > Publishing and edit all colours and texts. For advanced editing you will need to expand every Group in timeline and edit thru Inspector any values that you want to change.

2) Editing in Final Cut Pro X 10.3.3 or 10.4.4

Open Final Cut Pro X, go to "Title & Generators sidebar" and usually under "Generators" or "Custom" group you will find "Video Bumper". Drag it on timeline, click on it, and under "Generator Inspector" edit all colours and texts.

Note:

You can publish additional parameters under Motion 5 and save the template, then reload it again in Final Cut Pro X.
