

Logo Ident 4k

Requirements:

FcpX Apple Motion 5.4.2 or FCPX 10.4.4 or above versions

~ HOW TO INSTALL THE TEMPLATE ~

This template can be used in Final Cut Pro X with or without Apple Motion installed.

USE this method if you have Motion installed on your Mac
Copy folder to:

~/Movies/Motion Templates/Generators

USE this method if you DO NOT have Motion installed on your Mac
Copy folder to:

/Applications/Final Cut Pro/Contents/PlugIns/
MediaProviders/MotionEffect.fxp/Contents/Resources/Templates/
Generators

1)Editing in Apple Motion

When you open the project bin, click on "Media" bin, then click on "envato_logo.png" or "codecanyon-logo.png" and then go to "Inspector" and click on "Replace Media File" then browse for your logo file.

After you successfully replace logo file, now open the "LOGO and TAGLINE" group in timeline.

Now scale up or down your logo to match desired size and edit Tagline text or turn it off if you don't need it.

If you want to change background or render your logo on alpha channel (transparent) just turn off or change colors inside the Background Group.

2) Editing in Final Cut Pro X

– When you open Final Cut Pro X go to "Titles & Generators Sidebar" > "Generators"> or "Custom" and drag'n drop "Logo Ident 4k FCPX" from it on the timeline. Now open "Show The Generator Inspector" and edit Logo and text, blur, background color and other parameters.

Music file used in preview:

Quick Logo
