01. Select the layer "Sub_Text"

1700 frames duration Custom 1920 x 1080 25

The screenshot displays the Apple Motion software interface. At the top, the menu bar includes 'File', 'Edit', 'Mark', 'Object', 'Favorites', 'View', 'Share', 'Window', and 'Help'. The main workspace shows a slide with a building image and text elements labeled 'MAIN TEXT' and 'Sub Text Here'. On the left, the 'Inspector' panel is open, with the 'Text' tab selected. The 'Format' sub-panel is active, showing various text formatting options like font, size, alignment, and spacing. A red box highlights the 'Text' tab and the 'Format' sub-panel. Below the 'Format' panel, the 'Text' section shows the text 'Sub Text Here' being edited. Another red box highlights this text. In the center, a red box highlights the 'Sub_Text' layer in the 'Layers' panel. At the bottom, a red box highlights the 'Sub_Text' layer in the 'Timeline' panel. Red text annotations provide instructions: '02. Go to Text panel', '03. Go to Format panel', '04. Edit text here', '05. Adjust font or size of the here', and '01. Select the layer "Sub_Text"'. The bottom status bar indicates '1700 frames duration Custom 1920 x 1080 25'.
