

Hello!

Thanks for buying this item.
It's really easy to use:

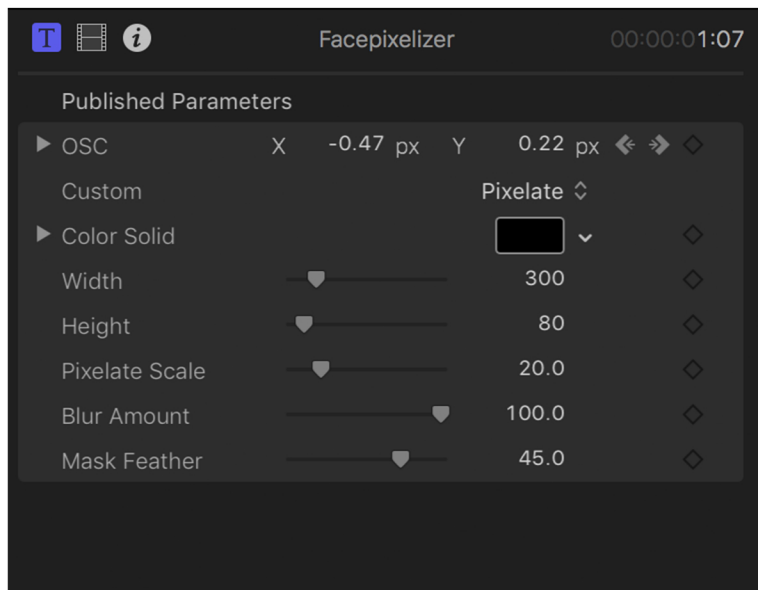

1. Enjoy the 24 Effects Toolkit package to speed up your editing.
You can combine layers for any title effect you want.
The package contains the effects:

Name	
▶ Adjustment Layer	▶ Smooth Skin
▶ Auto Zoom	▶ Spotlight
▶ Clip Viewer Full Area	▶ Strobe Frame Rate
▶ Colors Adjustment	▶ Subtitle
▶ Compare Image	▶ Take Shot
▶ Detail	▶ Tilt Shift
▶ DSLR	▶ Widescreen Aspect
▶ Facepixelizer	▶ Widescreen Crop
▶ Glow Edges	
▶ Gradient Overlay	
▶ Gradient Sky	
▶ Gradient Tool	
▶ Guides	
▶ Picture in Picture	
▶ Shadow Horizontal	
▶ Shadow Vertical	

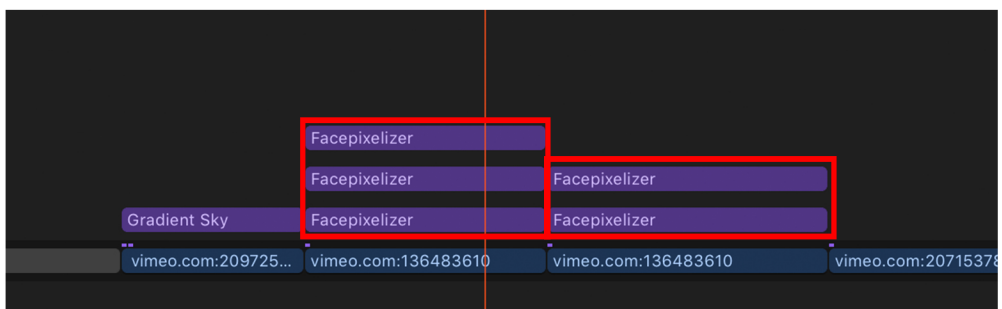

2. Drag a title layer onto your images at any point and move them easily.
Wherever you put the layers, it will affect all the clips below.
It is not necessary to make a Compound Clip.

3. The Effects have changeable parameters.
Adjust the parameters to customize the effect.

4. Drag the desired layer effect onto the clip. Adjust the ends.
Remember, anything below the effect will be affected.

If you have any questions - please, contact me via my personal page.

Thats all
Hope you like it and again - thanks for buying.

Best regards AleFX!
