

Hello! Thank you for purchasing VHS Opener!

Fonts used: Synchro

To install:

Please open FCPX folder. Open the Effects folder and copy VHS Opener folder to:

Applications / Final Cut Pro (right click-Show Package Contents) / Contents / PlugIns / Media Providers / Motion Effect.fcx / Contents / Resources / Templates / Effects

Open the Titles folder and copy VHS Opener folder to:

Applications / Final Cut Pro (right click-Show Package Contents) / Contents / PlugIns / Media Providers / Motion Effect.fcx / Contents / Resources / Templates / Titles

Open the Transitions folder and copy VHS Opener folder to:

Applications / Final Cut Pro (right click-Show Package Contents) / Contents / PlugIns / Media Providers / Motion Effect.fcx / Contents / Resources / Templates / Transitions

1 - Open Final Cut Pro X. Go to File-Import-Xml and in the XML folder choose *VHS Opener 1080p.fcpxml*

2 - Find the media you need. Open placeholder Clip1 and drop your media in to the timeline. Make adjustments to VHS effect by selecting

a placeholder and opening an inspector menu. Transitions effect can be changed as well as VHS effect.

3 - To change text, open a Clip placeholder, select text layer and go to inspector menu to change settings.

4 - Go to last placeholder Clip 16+LOGO, open it and place your logo inside

Tips:

- Change transitions duration and position by stretching and dragging it.

- You can copy VHS effect to a different clips
- You can find all transitions in Transitions Browser (VHS Opener)
- You can find all VHS effects in Effects Browser (VHS Opener)
- You can find all titles in Titles and Generators sidebar (VHS Opener)

This opener requires **Final Cut Pro 10.4.3** and above

Enjoy!
